

ABUL QASIM

Software Engineering Manager

Ottawa, ON · +1.613.793.0724 · abulqasim110@gmail.com · linkedin.com/in/abulqasim

PROFESSIONAL SUMMARY

Software Engineering Manager with **10+ years** of progressive experience leading high-performing, cross-functional teams and delivering enterprise-scale products. Proven record of managing **teams of 7+ engineers**, driving **100% on-time delivery** and **99.9% uptime**, and architecting microservices on AWS/GCP. Deep full-stack engineer at heart across Java, React, and Ruby on Rails, who modernized legacy fintech systems, led digital transformation, and mentored 20+ developers while sustaining exceptional team retention.

CORE COMPETENCIES

Leadership & Management

Team Leadership (7-10 engineers) · Agile/Scrum Master · Stakeholder Management · Technical Strategy · Capacity Planning · Performance Management · Hiring & Mentoring

Backend Technologies

Java · Spring Framework · Ruby on Rails · Node.js · Python · C# · .NET · REST/GraphQL APIs · Microservices Architecture

Database & Data

PostgreSQL · MySQL · MongoDB · Redis · Apache Kafka · SQL Server · Data Modeling · Performance Optimization

Cloud & DevOps

AWS (EC2, S3, RDS) · Google Cloud Platform · Docker · Kubernetes · CI/CD Pipelines · Infrastructure as Code · Monitoring

Frontend Technologies

React.js · Vue.js · AngularJS · JavaScript/ES6+ · HTML5/CSS3 · Responsive Design · Material UI · Backbone.js

Tools & Methodologies

Git/GitHub · JIRA · New Relic · Raygun · TDD/BDD · Code Reviews · Agile/Scrum · Technical Documentation

PROFESSIONAL EXPERIENCE

Engineering Manager

Feb 2026 - Present

Ratehub

- Leading a cross-functional squad of **6 engineers (3 FE, 2 BE, 1 QA)** in a Product-Design-Engineering triad, shipping core platform infrastructure and the flagship *Memberships* suite
- Owning quarterly and annual capacity planning with a lightweight estimation model that keeps delivery predictable across squads
- Driving an engineering-first review culture with architecture and code reviews, plus *rapid PoCs* that de-risk direction before Product commits
- Introducing an engineering *onboarding playbook* that ramps new hires quickly and consistently
- Coaching peer engineering leads new to management and steering org-wide structure in a **Director-adjacent** capacity
- Partnering with Marketing on *Generative Engine Optimization (GEO)*, setting front-end readability standards for LLM discoverability, a first-mover play in Canadian fintech

Software Development Manager

Aug 2023 - Jan 2026

Allocadia (Uptempo)

- Led cross-functional team of **7 engineers, 1 PM, and 1 UX designer** delivering an enterprise marketing operations platform serving **500+ enterprise customers**
- Architected and delivered scalable microservices using *Java, Spring Boot, Apache Kafka, React, GraphQL, MySQL* achieving **99.9% uptime**
- Optimized Agile processes and sprint planning, achieving **95% on-time delivery** and **20% improvement in sprint velocity**
- Implemented comprehensive monitoring with *AWS CloudWatch, Raygun, New Relic* reducing mean time to resolution by **30%**
- Established 1:1 coaching and career development programs resulting in **zero voluntary turnover** and **3 internal promotions**
- Collaborated with C-level executives and product stakeholders to define technical roadmap and prioritize high-impact features

Development Team Lead / Senior Full Stack Engineer

Jul 2022 - Aug 2023

Telus International

- Led engineering team of **6 developers** building customer-facing telecommunications applications serving **1M+ active users**
- Designed and implemented containerized microservices architecture using *Docker, Kubernetes on Google Cloud Platform* improving deployment efficiency by **40%**
- Developed high-performance web applications using *Ruby on Rails, Vue.js, React, Backbone.js, Node.js* with comprehensive test coverage
- Established code review standards, mentoring protocols, and best practices increasing team code quality metrics by **25%**
- Collaborated with cross-functional product, design, and QA teams to deliver **20+ major features** aligned with business objectives

Senior Full Stack Engineer / Team Lead

Mar 2020 - Sep 2021

Guardian Capital (Modern Advisor)

- Led team of **5 Full Stack Engineers** modernizing legacy financial management systems to an automated portfolio management platform
- Architected and developed fintech applications using *Ruby on Rails, AngularJS, React, Node.js, Material UI* handling **\$50M+ in assets**
- Implemented comprehensive TDD practices using *RSpec*, achieving **85% test coverage** and reducing production incidents by **35%**
- Collaborated with financial advisors and compliance teams to ensure regulatory adherence and a seamless user experience
- Optimized database performance and implemented caching strategies improving application response times by **30%**

Full Stack Web Developer
National Judicial Institute

Jun 2019 - Mar 2020

- Developed judicial education web applications and automation tools using *ColdFusion, Mura CMS, Hibernate ORM*
- Built advanced ColdFusion Components (CFCs) with complex business logic for legal case management systems
- Designed responsive interfaces using *HTML5, CSS3, JavaScript* improving user engagement by **20%**
- Implemented automated testing frameworks ensuring **98% application uptime** for critical judicial systems

Software Developer

Jan 2018 - Jun 2019

Department of National Defence

- Designed and developed secure web-based defense applications using *.NET Framework, C#, ASP.NET* for military operations
- Architected efficient *SQL Server* databases and stored procedures optimizing data retrieval by **25%**
- Facilitated cross-departmental communication gathering requirements for mission-critical government systems
- Ensured compliance with government security standards and implemented robust authentication mechanisms

ADDITIONAL PROFESSIONAL EXPERIENCE

Web Developer (Freelance) AQI Blockchain Intelligence • Built custom e-commerce sites with <i>WordPress, PHP</i> • Developed blockchain analytics dashboards with real-time data visualization • Integrated secure payment gateways and cryptocurrency support	Jan 2016 - Aug 2017	Computer Science Professor (Part-time) Algonquin College • Deliver lectures and labs in Web Development, OOP Java, Mobile Development, and Computer Architecture • Mentor 100+ students annually in software development and career guidance • Developed curriculum for modern web technologies and industry best practices	Aug 2019 - Present
Design Engineer MDS Aero Support • Administered engineering design and approval workflows for aerospace components • Developed CAD automation tools improving design efficiency by 25% • Collaborated on aircraft maintenance solutions across teams	2013 - 2016	Full Stack Bootcamp Instructor University of Toronto • Designed a comprehensive <i>MERN</i> stack curriculum (MongoDB, Express, React, Node.js) • Trained 50+ students in full-stack development and GraphQL • Achieved 95% completion and 85% job placement	Sep 2022 - Mar 2023

EDUCATION & CERTIFICATIONS

Bachelor of Applied Engineering, Computer Science University of Ottawa <i>Honors, Management & Entrepreneurship • GPA 3.8/4.0 • 2015-2018</i>	Diploma in Robotics Engineering Algonquin College <i>Dean's Honor List 2010-11, 2011-12 • 2010-2012</i>
---	---

LEADERSHIP & TEACHING IMPACT

Lead Instructor, Web Development W3Schools.com • Led instruction across front-end and back-end development technologies • Mentored teaching assistants and shaped cohesive learning experiences • Specialized in HTML, CSS, JavaScript, Git, React, Node.js, and SQL	May 2023 - Dec 2023	Key Achievements Career Highlights • Mentored 20+ junior developers into senior roles and promotions • Sustained 99.9% uptime and 95% on-time delivery on enterprise platforms • Built teams with zero voluntary turnover	2015 - Present
